The Certified Instructional Designer/ Developer program is fast-paced and relevant, the activities are engaging and, most of all, the development content is immediately useful in my daily work. I have everything needed to be successful and content with the entire experience. My recommendation to my managers is for as many of our developers as possible to attend this and other Langevin offerings—job well done!

I wish I could provide some feedback to help improve this course—I just can't see where it needs improvement! I enjoyed the entire experience and my expectations were exceeded. The content, materials, course length, and instructor were spot on! It was truly an enjoyable and educational experience. I feel comfortable applying the skills I obtained from this course—isn't that the point?! Great job Langevin!
