Orlando, Florida

\$4999

(Langevin alumni will receive a 25% savings)

Workshop Overview

Design successful courses that are interactive, engaging, and lively. Gain the core skills to accurately diagnose training needs and to create relevant courses that truly improve employee job performance. Learn how to apply Langevin's proven 12-step design process to simplify your job, save you time, and consistently produce top-quality courses.

- Achieve professional certification
- Meet industry leaders
- Exchange ideas
- Form valuable connections
- Explore the vibrant city of Orlando

Key Workshop Objectives

For trainers who want to develop and enhance their instructional design skills using an Instructional Systems Design (ISD) model to improve the effectiveness of their courses.

- Apply a 5-step consultative approach to analyze training needs.
- Plan instructor-led training courses that address performance needs.
- Design instructor-led training that sets learners up for success on the job.
- Evaluate instructor-led training courses.
- Translate job-related knowledge and skill into clear, concise, and complete terms for your target audience.
